### **Objective:**

A motivated and detail-oriented computer engineering graduate with experience in Flutter development, looking to start a career in software development and system management. I have strong skills in programming and database management, and I've developed both mobile and web applications with user-friendly designs.

I'm a fast learner, open to new tools and environments, and enjoy working in a team. I quickly pick up new ideas and love solving problems, which drives me to keep learning and improving. I'm excited to apply my skills, work with experienced professionals, and contribute to meaningful projects while growing in a technology-focused company.

### **Technical Skills:**

- **Languages:** HTML, CSS, Flutter, Python
- **Database:** Firebase, SQL
- **Tools:** VS Code, REST Apis, GitHub, Postman, Figma
- **Framework:** Flutter BloC, GetX
- **Operating System:** Windows

### **Behavioral Skills:**

- Team Player and Great Communicator
- Good Listener
- Disciplined and Punctual
- Quick Learner & Problem Solver
- Exploring New Technologies and Collaborative Coding

### **Education Qualification:**

- **B.Tech (Computer Engineering) :**
  - Duration: 2020-2024
  - CGPA: 9.00
- **12<sup>th</sup> (PCM):**
  - Duration: 2017-2020
  - Percentage: 46.8%
- **10<sup>th</sup>:**
  - Duration: 2016-2017
  - Percentage: 63%

## **Position and Responsibility:**

- **Intern | Flutter Developer (Aug 2023 – Feb 2024)**
  - **Company:** Spike Point Infotech Private Limited (Gandhinagar – Gujarat (On-Site))
  - Developed a Grocery Application introducing innovative features for the next generation of grocery shopping, focusing on user-friendly solutions.
  - Played a key role in designing the front-end of the Shop-On Application, a Fashion E-commerce App, adhering to company design guidelines.
  - Managed and guided a team of frontend interns for two months, fostering collaboration and enhancing the overall design quality of the projects.
- **Flutter Developer (March 2024 – Present)**
  - **Company:** Aviato Consulting (Sydney - Australia (Remote))
  - Developed the PinkCloud Application to support women in Australia in their journey to leave alcohol, incorporating features tailored to their unique needs.
  - Played a key role in developing GameFight, a web application where users can create matches and challenge opponents, enhancing the gaming experience.
  - Developed the FunZy web app for draws and discounts, including a shop section, for an Australian client managing school fundraising.
  - Created the GGE (Giant Gippsland Earthworm) app, allowing users to add sightings of worms they find; this project is funded by the Australian government.

## **Projects:**

- **CSE Learning Hub | Founder & Developer**
  - Initiated and developed the CSE Learning Hub mobile app, simplifying the study experience for computer engineering students.
  - Within the app, students can access various helpful resources such as previous papers, study materials, books, and DE reports from different colleges. My goal was to ensure that everyone can easily obtain the study materials they need.
  - Since the app launched, it's been used by over 1300 students. I'm happy that the app is helping so many people learn and do well in their studies.
- **Social Media Monitoring App | Developer**
  - Developed the Social Media Monitoring App to assist the Ahmedabad Police Cyber Crime Department in easily accessing user details and profiles, enhancing their operational efficiency.
  - Received an Appreciation Letter from the Deputy Commissioner of Police (Ajit Rajiaa) for the app's positive impact and effectiveness in supporting cybercrime investigations.
